

Enterprise Management Associates Recognizes CA's Leadership in Enterprise Hybrid Cloud Management

April 25, 2018

CA Unified Infrastructure Management Recognized for Cloud Management Capabilities, Scalability and Ease of Use

NEW YORK--(BUSINESS WIRE)--Apr. 25, 2018-- CA Technologies (NASDAQ:CA) today announced that it has been named a "Value Leader" by Enterprise Management Associates (EMA) in its [Enterprise Hybrid Infrastructure Monitoring \(EHIM\) Radar Report](#). For the report, EMA scored solutions based on their ability to discover and monitor servers, networks, hypervisors, containers, storage systems and public cloud services.

[CA Unified Infrastructure Management](#) (CA UIM), a comprehensive cloud and hybrid IT monitoring solution evaluated for the report, received strong scores for ease of use and administration, operational analytics, platform functionality – including cloud support, fault isolation and troubleshooting, architecture and integration.

According to the report, "IT organizations increasingly need hybrid infrastructure monitoring solutions that can support cross-domain operations for private, public, and hybrid clouds. Whether an enterprise has a dedicated network operations center (NOC), a cross-domain operations center, or something else, full-stack, hybrid cloud visibility is no longer a secondary requirement. It is essential."

"CA UIM is an example of a comprehensive, purpose-built solution designed from the ground up to provide visibility across on-premises and cloud infrastructures," said Shamus McGillicuddy, senior analyst, EMA. "IT operations professionals say CA UIM is easy to use and maintain. CA also provides a broad set of integrated advanced analytics and monitoring tools that can further enhance the overall AIOps value of CA UIM."

"The rapid adoption of cloud and dynamic infrastructures, alongside the presence of traditional resources, is fueling complexity within enterprise IT environments" said Ali Siddiqui, general manager, Agile Operations, CA Technologies. "CA UIM provides an analytics driven, unified approach that drives operational efficiencies and improves visibility across hybrid infrastructures allowing IT Operations teams to more easily adopt the right mix of technologies that are needed in their role as business enablers of a modern software factory that supply new and evolving applications with exceptional services."
